

LTG and Honeywell Strategic Alliance Frequently Asked Questions (FAQ'S)

We are committed to...

- Providing innovations in safety
- Building a safety platform for all Li-Ion battery users
- Enabling the growth of clean energy
- Collaborating with partners to optimize the use of Energy Storage Systems

General Questions

Q: Who is Li-Ion Tamer Group

A: Li-Ion Tamer Group (LTG) is a wholly owned subsidiary of Nexceris LLC. The Li-ion Tamer products were developed by Nexceris, LLC. Nexceris is an energy company that develops innovative sensor, power generation and catalyst solutions. Founded in 1994, Nexceris' vision is to create a better world through energy innovations. The company collaborates with global customers and partners to transform powerful ideas that make energy production safer, more efficient and environmentally responsible. For more news and information on Li-ion Tamer, visit <http://www.li-iontamer.com>

Q: Who is Honeywell

A: Honeywell is a global leader in fire and life safety. It creates fire and life safety innovations that provide the earliest detection, enable the fastest response and centralize decision making and system management.

Honeywell's advanced detection business features the VESDA brand of advanced smoke detection technology including aspirating smoke detectors. VESDA is the world's leading aspirating smoke detection (ASD) system.

The strategic alliance will make Li-ion Tamer technology available to customers and channel partners across Honeywell's portfolio of trusted and well-known life safety brands.

Q: What is the focus of this new partnership

A: LTG and Xtralis are looking forward to building on the Li-Ion Tamer base technology and distributing these safety solutions throughout the world. The Xtralis global distribution network will allow Li-Ion Tamer technology to reach all corners of the earth and every market segment where Li-Ion battery technology is used.

Q: How do I buy Li-Ion Tamer

A: Honeywell will be the sales and distribution arm of the partnership. All sales will be handled through Honeywell and their current distribution partners globally.

Q. Is this a global business

A: With Honeywell holding the distribution rights, every market will be addressable.

Q. How will this benefit Honeywell existing partners

A: Expanding the portfolio to protect facilities and people from the challenges faced by the emerging use of lithium batteries. As a life safety focused business, the Li-ion Tamer portfolio adds another detection technology to secure life and property around the world.

Q. How do I learn more about the two companies forming this new partnership and make contact:
